Subject: Frontend Developer Intern

Dear Mr. Wessner,

I am writing regarding the open Frontend Developer Intern position at your company as advertised on your website. A developer position in Ventzke Media, a Leading Technology company, which creates Future-proof digital solutions and processes, will fuel my passion for developing applications.

Recently, I accomplished an intensive Fullstack Web Development course at DCI Digital Career Institute Leipzig gGmbH. From learning technologies such as MongoDB, React, and Node.js and developing Javascript projects, I can now say that I feel confident in becoming part of your practical projects to gain more hands-on experience in web development.

Besides, my work experience as a freelancer in the development of websites and applications has given me the foundation for kick-starting a career in tech. I am excited to learn from industry professionals, especially on your team. The principles, such as "Future-proofed and solve problems before they arise" are what I find important in my professional life.

On these grounds, I believe that my collaboration, planning and problem-solving abilities will support and drive your continuous organizational success.

I am looking forward to further introducing myself in a personal conversation.

Mehmet Ali Tutumlu
